## PERSONAL STATEMENT:

Software Engineering is one of my interest research area as well as NewSQL databases. Big Data is interesting topic to work on and doing such experiments to monitor how great several tools address and deal with such significant data to process and then to store. I have experience enough toward that. Machine Learning approach is my new area I am surfing and mingling with and I confront several amazing algorithms which teach machine how to behave, decide on behalf, or manage risk. Another challenge is Software Architecture area where I have learnt how software act with user closely and solving software problems.

## EDUCATION AND QUALIFICATION :
